## 👤 Professional Profile

---

Currently a Business Analyst with experience in data analysis, model validation, manual testing and project management. I am a passionate full-stack developer too, eager to join a dynamic team where I can bring my creativity and problem-solving skills to the table. Excited to collaborate on challenging projects, learn new technologies, and make meaningful contributions to the world of web development.

## 📁 Projects

---

### Netflix Dataset Dashboard : *Tableau*

Analyzed streaming data to visualize trends in viewership, popular genres, and user engagement. Gained insights into content performance and audience preferences to drive strategic decisions.

- *Click here to visit*

### My Ecommerce Shop: *MERN Stack*

Our MERN stack e-commerce app offers intuitive navigation, robust product listings, and secure checkout. While lacking order tracking or a 'My Cart' feature, it provides a seamless shopping experience with user authentication, a comprehensive product catalog, and responsive design.
